## 1. Introduction

There are two sample files available: one is called the Households Sample File (Section of State) ; the other is called the Households Sample File (State/Territory) . Each file contains information collected on census night, 30 June 1986, from a one per cent sample of households in occupied private dwellings and caravans etc. in caravan parks and for all persons counted within each selected household, and for a one per cent sample of persons in non-private dwellings. The samples have been selected independently.

The release of the sample files is made possible by recent changes to the Census and Statistics Act 1905 which allow for the release of data in the form of unit records where the information is not likely to enable the identification of a particular person or organisation. There are no names or addresses on any census files held by the Australian Bureau of Statistics (ABS), and for the sample files the ABS has suppressed or reduced the detail for some items of data to ensure that the confidentiality of individuals is protected.

These files are released only under certain conditions of use which are specified in paragraphs 11-16 of *Census 86 - Sample Files on Magnetic Tape* (2184.0). It is important that all users, whether making use of the file shortly after receipt, or in subsequent months or years, be fully aware of the permitted uses of the contents of the files and the penalties for their misuse. Copyright in the data recorded on these magnetic tape files is in the Commonwealth of Australia.

## 2. Features of the Households Sample Files

Each file:

- (a) contains a record of census information for each person, dwelling and family (described as 'Record type' in sections 4.1 and 4.2) in a one per cent sample of unidentified households in private dwellings and caravans etc. in caravan parks, and a one per cent sample of persons in non-private dwellings;
- (b) is further subdivided into 20 subsamples (ten independent subsamples containing persons in private dwellings and caravans etc. in caravan parks, the other ten containing persons in non-private dwellings, each subsample representing 0.1 per cent of the population concerned) sorted into order of subsample number (described as RGN in sections 4.1 and 4.2).
- (c) has all geographic references removed, other than a code showing major urban/other urban/rural for the Section of

State File and codes for major urban/balance of State/Territory and State/Territory for the State/Territory file, to ensure that the confidentiality of households and individuals is protected. Note that on the State/Territory File, the Northern Territory and the Australian Capital Territory are combined; and

- (d) contains data on all persons in the selected households, and therefore allows a user to produce tabulations on characteristics of households, dwellings, families and persons.

### 3. File structure

Each file is available on a single reel of magnetic tape containing one data file. Section 4 describes the record structure of the file and the information contained on it.

Labelled reels have the following structure:

```
(load point)
VOL1 label
HDR1 label
HDR2 label
(tape mark)
copyright print record
(tape mark)
EOF1 label
EOF2 label
(tape mark)
HDR 1 label
HDR 2 label
(tape mark)
data blocks
(tape mark)
EOF 1 label
EOF 2 label
(tape mark)
(tape mark)
```

A detailed description of the structure of labels is available in Appendix D of *Census 86 - Sample Files on Magnetic Tape* (2184.0).

Unlabelled reels have the following structure:

```
(load point)
copyright print record
(tape mark)
data blocks
(tape mark)
(tape mark)
```

Records on the Households Sample Files are 57 characters long. Block size is 1995, thus there are 35 records per block. The last block on the file may be short.

#### **4. Record structures**

Sections 4.1 and 4.2 describe the record structures of the files. Note that full classificatory detail is available for some variables and these are represented by a three character mnemonic - see Appendix A. Recodes of variables (i.e. where other than the full classificatory detail has been provided) have been distinguished by additional characters appearing after the mnemonic e.g. ABD 02S, BPL 36.

Appendix A contains descriptors and codes for each data item available on the files.

The records on the files are sorted into 10 groups, by subsample number. Each group is further sorted into non-private then private dwellings. All fields in the record are numeric.

The hierarchy of records is:

- (a) dwelling record;
- (b) family record; and
- (c) person record.

## 5. Using the data

Any counts derived from this file should be multiplied by 100 to obtain estimates of the total number of persons or households in the population with the same characteristic. All estimates so obtained are subject to sampling error and the sampling error on small cells can be very high. More details on sampling error are contained in Appendix C of *Census 86 - Sample Files on Magnetic Tape* (2184.0)

Appendix C contains statistics for Australia from the seven page format containing 46 tables. These tables were produced from the census final unit record file (FURF), not from the sample file,

and therefore do not contain any sampling error. They will be useful for benchmarking purposes.

The numbers of households and/or persons in each subsample are shown in the following tables:

(a) Households Sample File (Section of State)

Subsample number	<u>Private dwellings</u>		<u>Non-private dwellings</u>
	Households	Persons	Persons
0	5,268	15,357	503
1	5,268	14,897	577
2	5,268	15,114	559
3	5,268	15,093	505
4	5,268	15,171	517
5	5,268	14,846	528
6	5,268	15,232	490
7	5,268	15,074	510
8	5,267	15,121	511
9	5,267	15,161	536

(b) Households Sample File (State/Territory)

Subsample number	<u>Private dwellings</u>		<u>Non-private dwellings</u>
	Households	Persons	Persons
0	5,268	15,318	526
1	5,268	14,974	515
2	5,268	15,218	535
3	5,268	15,099	567
4	5,268	15,189	518
5	5,268	15,186	510
6	5,267	15,225	505
7	5,267	14,940	529
8	5,267	15,088	527
9	5,267	15,250	504

To assist in the validation of estimates produced from the sample files, some basic estimates for total Australia obtained by the ABS from the files are:

	Section of State File	State/Territory File
Total persons	15,630,200	15,672,300
Total persons aged 15 years and over	11,984,500	11,985,100
Total persons born overseas	3,312,700	3,271,200
Total employed persons	6,533,400	6,553,500
Total households	5,267,800	5,190,000
Total married persons	6,942,200	6,980,600
Total rented dwellings	1,330,700	1,343,100
Total families	4,174,500	4,182,000

## APPENDIX A

## CLASSIFICATIONS AND RECODES FOR THE HOUSEHOLDS SAMPLE FILES

Note that full classificatory detail is available for some variables. Recodes of variables (i.e. where the classificatory detail has been reduced) have been distinguished by additional characters appearing after the mnemonic (e.g. ABD 02S, BPL 36). For information, full classificatory detail for all variables is provided in Section 5 of the *Catalogue of 1986 Census Tables* (2175.0).

The variables 'Record type' and 'RGN' do not appear in this listing as they are fully described in Section 2 of this paper.
